# ROADMASTER™

LIQUID CALCIUM CHLORIDE

The liquid solution to your dust control & road stabilization problems...ROADMASTER™ can help promote safe driving with fewer complaints.

Adding ROADMASTER™ to your gravel road maintenance program reduces costly blading and aggregate loss up to 50%.

- Controls Dust
- Lowers Maintenance Costs
- Provides a Safe, Smooth Surface
- Environmentally Friendly
- Reduces Complaints
- A Proven Performer

## ROADMASTER™

- Has unique properties. It is both hygroscopic (draws moisture from air) and deliquescent (resists evaporation).
- Significantly reduces costly and time consuming blading, gravel replacement and complaints from the motoring public.
- Improves visibility and safety with a smooth and compact driving surface.
- Creates an environmental "Safety Zone" that helps protect nearby residents, sensitive crops, roadside vegetation and animals.

## Where is ROADMASTER™ used?

- Rural Roads
- Unpaved Streets
- Subdivisions
- Haul Roads
- Construction Sites
- Industrial Yards
- Quarries/Mines
- Recreational Areas

### APPLICATION GUIDE

Gallons per Sq. Yard	Width of Spread	Gallons per Mile	Miles per 4350 Gallons (1 Truckload)
.35	16	3285	1.32
.35	18	3696	1.18
.35	20	4107	1.05
.35	22	4517	.963
.35	24	4928	.883
.50	16	4693	.927
.50	18	5280	.824
.50	20	5866	.742
.50	22	6453	.674
.50	24	7040	.618

## PREPARATION & APPLICATION GUIDELINES

- Correct any drainage issues and address any material shortages on road surface.
- Blade and shape road to modified "A" crown removing potholes and washboards.
- If roadway is dry, watering may be necessary during blading to conserve the fine dust. Moisten road surface again just before dust control application.
- ROADMASTER™ is applied at a recommended rate of 0.35-.50 gallons per square yard (Rate is determined based upon your individual needs or specific requirements.).
- Compact road surface.
